SUPPLEMENT TO
REPORT NO.

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT OF U. S. C. 31 AND 32, AS AMENDED. ITS TRANSMISSION OR THE REVELATION OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

1. After three and one-half months of basic training in the Bulgarian Navy, personnel are divided into two groups. One-third of the personnel are kept in the Navy for further training, while the remainder are transferred to the Frontier Guard units which are under the Ministry of the Interior in order to evade the limits placed on the total number of Bulgarian armed forces.
2. Bulgarian personnel sent to the Soviet Union are given typhus shots.
3. The advanced naval training schools formerly at Varna, Ruse, and Burgas are now combined in one school at Varna. No Soviet personnel are teaching or attending this school.
4. The naval ammunition depot in the Zvezditsa sector of Varna, one and one-half kilometers south of the Chayka airbase, has mines, depth charges, and torpedoes stored. The torpedoes are of Soviet make and are air driven. The maximum range of these torpedoes is 15 kilometers and the speed is ten knots. Reportedly, magnetic and sound responsive mines for river use are stored at this depot.
5. All Bulgarian torpedo boats are equipped with automatic pilots. The automatic pilots consist of a gyro stabilizer, activating equipment under the deck, and a control box on the bridge. The torpedo boats are also equipped with a radio with two antennas. One antenna is of long white metal, police car type. The second is semicircular, made of copper, and used possibly for handling radio-controlled torpedoes.
6. Torpedo bombers, numbers and type unknown, are stationed at the Balchik naval air station.
